

Service Plan Announcement

We hope by now you have had the opportunity to familiarize yourself with our DIVI machine, the most reliable and versatile machine ever manufactured by Fastcorp, carrying a 5-year limited parts warranty.

Fastcorp has been servicing the vending community needs since 1990. We work hard to provide all of our customers with the latest in equipment, technology as well as continued parts availability and technical support on our legacy and obsolete models.

We have always been flexible in our service and technical support. In order to stay current with the times and compete more effectively, we're instituting new features this year and making changes to others.

We are pleased to announce the launch of our on-line store for all your parts needs. Here you can easily search by machine model, pay online and schedule for delivery! Please complete the access request form and your account will be created.

Beginning July 1st, a new service, and technical support tiered plan will be implemented for our out of warranty and legacy equipment. I hope that you understand that these changes are necessary in order to continue our viability and reputation as the best technical service in the industry. We continue to update our on-line technical resources with videos and documentation and are confident the additional parts discounts based on the plan will help to offset any unexpected expenses.

We thank you for your continued support and look forward to many more years of servicing all of your vending and automated retail needs.
